

#6

Background Information

Revised Recommendations for June CUW

Recommendations:

1. Define vegetation/vegetated as : Native or non-invasive live plant material which will mitigate erosion or stormwater runoff. ***(Definition accepted at the April, 2021 CUW Committee meeting)***
2. Mandate: The access and view corridor must be maintained with vegetation. Sand, gravel, rock, or other similar materials shall be prohibited.
3. Include definition of compliant vegetative buffer under 9.95a: Shall contain three distinct layers including a tree canopy, shrub layer, and groundcover layer, except for closed canopy forest types such as pine and hemlock.
4. If possible, establish a provision to reduce/prohibit cutting of trees over a certain dbh (diameter at breast height) in the access and view corridor.
